

If I had an
idea
I didn't
just think
about it.
I built it.

Les Paul

Les Paul invented
a solid-body
electric guitar,
multi-track
recording and
recording
techniques that
are used every
day by today's
rock stars. He was
a gold record
recording artist.

14 year old Lester's float took first place in Waukesha's 4th of July parade.
Do you see his harmonica holder? It was Les' first invention?
